The compe-tition for booths and bars, the sale of which commenced a day or two ago, was very lively, and good prices generally were real-ized. A large number of Baltimoreans vis-ted the Schustzonfest here, and went away thoroughly satisfied with the attention they Our citizens who may visit Baltimore on the occasion of their fost will not be

HAIL STORM IN SPOTTSYLVANIA AND CARO HAL STORM IN SPOTTS LUNIA AND CARDINA.—During the copious fall of rain on Thursday afternoon a part of this county and Carolina were visited with quite a severe hall storm. The hall was very destructive, and had it apread over a large area both counties would have been left in a deplorable situation. The pieces were, in some instances, as large as guince eggs, almost cultrily destroying the tokacco and corn crops, stripping the trees of their foliage, injuring all kinds of vegetation, and where dwellings came in its course demollabing windows. Some of the crops were pretty nearly used up before, but the hall fluished what the drought had spared.

which goods it carried on minutes among tious.

Much sympathy is felt for the firm among business men generally, by whom the house was regarded as one of the most enterprising and honorable in the dry goods line. The members of the firm are busily engaged in making up their books, and in a few days they will be enabled to make a report of their condition and the actual amount of their liabilities to their creditors. The ball storm came within a mile of town, alonk the Plauk road, and among the sufferers we have heard the names of Mr. Key Howard, Mr. Walker Landram, Mr. W. E. Straight, Mr. Mills, and others.

In Caroline we hear of its visiting with

Cricago has started a subscription which lready foots up \$50,000 for the purpose of guanting a base ball nine to beat Cincin-ati next year. Sucu figures as the following read rather strange from a State like Alabama: Montgomery, Bulkley, (Radical,) 8,082; Worthy, (Democrat,)—(what a name for a Democratic candidate!)—1,015.

PRILADELPHIA'S WALL is a regular mu-

one of the most practical and useful in the world.

As a measure of compromise on this question of staff rank, some of the older and cooler-headed of our naval officers propose that the matter be referred for adjustment, previous to bringing it before Congress, to a beard of officers drawn from each branch of the service—say two from each branch of the staff corps, and an equal number of line officers. It is proposed that these officers should meet, discuss, and arrange the question, so as to avoid bringing it in so many forms before Congress, and inviting discussion, which will lead to crimination and recrimination, disgust Congress with the navy, and result disastrously to all concerned.

magnificent struggio between the pair, she went over the scores winner by a length and a half. Time, 1:49%. The style in which this fleet grand-daughter of the Flying Dutchman won the race, stamps her as one of the best two-year olds in the econtry, and also speaks highly for Mr. Morris's flying daughter of Eclipse and Barbarity, Remorestess, who beat Neille James on the Saratoga stakes.

The Connecticut seed leaf tobacce crop is now said to be beyond danger from the worms; and a fine crop is anticipated, if the grasshoppers will let it alone, for grasshoppers will let it alone, for grasshoppers are continued tobacco chewers. This crop, which is known in the market as "Connecticut Seed Leaf," is by no means now confined to Connecticut. The culture was begun, however, only a few years ago, in a small part of Hartford county, that is, in a few gardens in the towns of Windsor and Suffield. It was found that the soil in that section was peculiarly favorable to the production of a large and smooth leaf, admirably adapted for cigar-waspers and good for nothing else. Forthwith sprung up in these two towns, and afterwards is Windsor Rocks, small cigar manufactories and subsequently large once, which supplied the whole of New England with cheap cigars, made of Havana fillings and Connecticut wrappers, and known cverywhere as "Windsor particulars." A pretty good cigar of this kind retailed for a cent, and a very good one was sold for two cents.

This was thirty years or more ago. The fame of the leaf spread so that speculators from New York used to go up and buy nearly the whole group while it was standing or after it was cut and hung up in the drying-houses, and large quantities of it were exported to France, and even to Cuba, and are so exported now.

The crop itself spread also from Hartford county to other counts is Connecticut. Central and South American News.

The news from the south of Pern is meagre in the crirems. At Inquique there had occurred an earthquake shock on the shad occurred an earthquake shock on the shad occurred an earthquake shock on the sisted to have started off for the adjacent hills, in the dread expectation of natcher monster sea-wave. The volcano laings is in constant action, and this contributes to make people apprehensive and to wait with the dread and fear the coming months of August and September, when the great catacilism, is as prognosticated by the German assemomer, M. Falb, is to happen.

The Isthmus is quiet. Taxation is the allaboroting topic of conversation. Many insertinate among the foreigners are preparing to close up their business on account of the unjust, and as they claim, unlawful taxes. There is now a case pending before fifthe unjust, and as they claim, unlawful taxes. There is now a case pending before fifthe unjust, and as they claim, unlawful taxes. There is now a case pending before fifthe unjust, and as they claim, unlawful taxes. There is now a case pending before fifthe unjust, and as they claim, unlawful taxes. There is now a case pending before fifthe unjust, and as they claim, unlawful taxes. There is now a case pending before fifthe unjust, and as they claim, the years of the Summit by recent he south of the Health of the Summit by recent have years and the vicinity of the Summit by recent have years and the vicinity of the Summit by recent have years and the vicinity of the Summit by recent the 19th of July.

Mr. Henry Breat, United States Charge d'Affairs at Pern, has consented, at the instance of the members of the diplomatic corps interested in the matter, to be a member of a mixed commission for the arranging of the Callao piliage claims of 1895, in the place of Mr. Theodore Muller, the Prussian consul lately deceased. There are now only a very few cases left to be gone through, consequently there must soon be an ond to this apparently interninable business.

Nicaragonal let

and large quantities of it were exported to France, and even to Cuba, and are so exported to France, and even to Cuba, and are so exported to France, and even to Cuba, and are so exported to France, and even to Cuba, and are so exported to France, and even to Cuba, and are so exported to The crop isself spread also from Hartford Cuba; to other counties in Connecticut, and from Connecticut through the valley of the river, especially in Massachusetts, where some of the finest Connecticut leaf is now grown. Land once devoted to the raising of broom corn was turned to tobacco, to the resy great impoverishment of the land, for tobacco eats up the substance of the land, for tobacco eats up to bacco. The enormous profit on the crop, however, permits liberal expenditures every year for fortilizers. There was danger at one time that the farmers in the valley of the Connecticut would overdo the seed leaf business, as they did the mulborry leaf business many years ago, but the loss of a crop or two by the swisy frosts, which cared the farmers who hoped to ourse tobacco, has confined this production to places where the crop is a linear to the form of the farmers who hoped to ourse tobacco, has confined this production to places where the crop is almost certain to input the production to places where the crop is almost certain to input the production of places where the crop is almost certain to the farmers who hoped to ourse tobacco, has confined this production to places where the crop is almost certain to induce, and the supply, large as it now is, from year to pay the swing the production to place where the crop is almost certain to induce, and the supply for last year's stock on hand, the pripes have varied considerable production in an experiment of the prices have varied considerable.

\*\*Short Temperance Lectures\*\*
On Saturday mornings, a man was found to the connecticut to the prices have a supply to the production of the prices have a supply to the connecticut the production of the prices have a supply to the produ

Short Temperance Lectures.

A Wife's Inconstancy, and What Came of it.

William K. Lanphear, a respected citizen of Cleveland, Ohio, has for some time had a faint suspicion of the unfaithfulness of his wife. One day last week he entered his house from his place of business at an unexpected hour and found his wife in the room of a young man in his employ, named Stanley, and report says she was sitting or lying upon his bed-side. Their appearance and the general surroundings revealed the whole matter to him at once, and overcome by rage and shause, seized a large pocket knife, which was the only weapon he possessed, he sprang upon the couple and stabbed both of them severely. The woman fell, calling in tender and affectiogate tones on her enraged husband to pity and spare her. Stanley, after a little tussle, escaped and fied from the house in his robes send. The neighbors saw him, and from his hurried words found out the trouble. Tidings were brought to the police, and Detective Rowe and Officer Lawrence were upon the spot immediately. There they found the wounded woman on a lounge, covered with blood, clasping the neck of her betrayed and injured husband, beseeching him to pity and forgive her with the most heart-piercing shrieks. She begged of the officers to spare ber husband, and protested her innocence as only woman can. Medical stendance was summoned, and the wounds (which will probably prove fatal) dressed. The husband is in custody to await the result of the wounds indicted.

HEAVY FALLERS.—The extensive dry groot house of Bowers. Reckman & Co. of Short Temperance Lectures.

On Saturday morning, a man was found lying on the pavement at South street wharf. He was taken to the Second district stationhouse, where he died on Saturday evening. He was five feet ten inches in height, sandy hair, mixed with gray, dark mountache and gontee, black sack coat and pants, plaid vest and low walking shoes. His death was caused by intemperance—Philadelphia Inquiere 9th.

A man named Julius Black was shot and killed by Eugene Soulsier, in a drinking saloon and dauce house in West Indianapolis, on Saturday night. Soulsier was arrested.

A DRUNKEN MAN, contemplating suicide, on Sunday afternoon threw himself over the track of the New Jersey railroad, between Elizabeth and Waverly; but, unfortunately for his design, he was discovered by Mr. James Hutton, the engineer of a train which passed soon after over the other track. Mr. Hutton, on arriving at the Elizabeth station, informed the engineer of the first train to pass over the track on which the loabriate had thrown himself, then lying at that station, informed the engineer of the first train to pass over the frack of the man being there. When the engineer, moving onward, had signiced the wonlid-be suicides, he proceeded to the spot at which he lay, and having taken him into custody, sent him to the authorities at Elizabeth for safe-keeping.—V. Y. Times.

Heavy Failure.—The extensive dry goods house of Bowers, Beeckman & Co., of New York, suspended on Monday, and the liabilities are between two and three millions of dollars. The house was one of the heaviest in the city engaged in the business of domestic dry goods, and has long enjoyed the confidence of the merantile community. The failure is ascribed to the great depreciation in the values of wooliens, in which goods it carried on immonse transactions. CONFISCATED PROPERTY RESTORED.—
Many of our countrymen will remember at Count Francis Pulseky, who came among us as secretary to Kosauth. The "whirliging of time" has wrought quite a change in his fortunes. He is now reconciled to the Government, has had his large estates (formers of the confiscated) restored him, is right-hand man of Deak, the Hungarian premier, and (we see) was apokesman of the Hungarian deputation at Vienna on Friday. Let those who are unlacky to-day trust in to-morrow.—X. Triches.

Tru ore has recently been discovered near Augusta, Maine, at the point of junction be-tween a silicious sinte formation and granite. Several small but well defined yours, varying from half an inch to five luches in thickness. PINANCIAL AND COMMERCIAL
